

Products Overview

Adaptiva provides innovative IT efficiency and PC power management software solutions. A Microsoft Partner, Adaptiva extends Microsoft System Center Configuration Manager by providing revolutionary hierarchy simplification, client health assurance and PC power management solutions. Adaptiva helps users decrease the environmental impact of desktop computing, increase desktop manageability and end-user productivity, and significantly reduce IT operational costs. Adaptiva solutions leverage existing IT resources to enhance the operation of Configuration Manager without disrupting service to end-users. Adaptiva helps you significantly lower the total cost of ownership easily, quickly and cost-effectively.

Adaptiva is deployed on more than 1 million devices globally and sold directly and through a network of partners and channel resellers.

Adaptiva Companion™

One solution providing both PC power and configuration management.

- Tightly integrated with Microsoft's Configuration Manager and Systems Management Server.
- Centrally manage power profiles and power down PCs during non-work hours, while enabling end-users to set individual power profiles to maximize savings.
- Achieve complete control and visibility on system maintenance—wake up PCs during non-work hours, perform maintenance and restore the power state. Eliminate disrupting end-users with time-consuming software updates.

Adaptiva OneSite™

A time-saving and cost-efficient ConfigMgr extension that revolutionizes the management of a large distributed network.

- Manage a large distributed network as if it were a **single local network**.
- Improve content distribution to deliver dramatically faster package downloads.
- Simplify hierarchy, streamline operations and significantly reduce your total cost of ownership.

Adaptiva Client Health™

Easily and quickly perform scheduled or instant health checks on one or a collection of PCs.

- Centralize visibility and control.
- Reduce the cost of managing Windows, apps and PCs.
- Maximize the success of your computer management services with auto remediation, extensible with custom scripts and detailed reporting.
